officer and formally approved by the Board.

S — The Sanitary Commr in his letter No. 2596 of the 28th Decr 08, proposed that in the interests of sanitation it is highly essential that the opinion of the Sanitary authority should be taken in the matter of selecting new sites for the formation of extension & removal of villages. The above proposal was approved by Govt. (vide Govt. proc. No. 7636-45 dated the 10th Febry 09) with reference to the above order the Dy Commr Kadur District in his letter No. 432 dated the 6th April 09, to the Rev. Commr, represented that the proposal of seeking the opinion of the District Medical & Sanitary officer in each case of village extension would considerably delay the disposal of the case and the work may be entrusted to the Revenue officers.

Y — Govt. proc. No. 12465-75 dated 12.6.09 (Sam 132-08-6) the presidents of the Municipal & District Boards were informed that no modification of the order dated the 10th Febry 09 is necessary and directed that a period of 15 days or one month be fixed within which the St Sanitary officer should send in his reports as to the suitability or otherwise of the sites selected by the Rev. officers.

R — 2. In the letter under disposal the Dy Commr

7 I am not in favour of entrusting the work of selection of sites for extensions to purely Revenue authorities.

8 I do not think their training has been such as to enable them to know what to select or at least understand what to avoid in making a selection. Their ideas generally run towards close proximity of the site to water and conveniences than sanitary but which ignorant Villagers clamour for.

9 Questions involving the following considerations viz (1) Aspect or exposure of houses to wind light and air

(2) The ground or soil on which houses are proposed to be built

(3) The surroundings of the site

are more within the province of the Medical and Sanitary Department to solve.

10 That drainage of site is absolutely necessary or essential and that wherever possible high and dry sites are to be chosen are factors forgotten by the Auditors in their eagerness to oblige Villagers.

11 I forward copies of Correspondence on the subject of selection of Sites in the Chittagong District between the D.C. &

NOTE—Contn. sheet.

GPB—50,000—13-5-08

Serial No.

the Dr Commr himself for favr of perusal.

12 The one great difficulty in providing District Sanitary Officers to Districts not yet possessing such officers is the dearth of properly qualified men i.e. those possessing a diploma in Public Health or Licence in Sanitary Science in addition to a medical degree.

13 The three last newly qualified men from England have been posted to important Charges and one Mr Armstrong who is a Dr. and who had been asked by me if he would accept a Distt: Sanitary Officer's place on Rs: 150-10-250 has not given me any written reply. He has however verbally intimated to me that if he be given a Starting Salary of Rs: 250/- p.m. he may accept the place of a Distt Sanitary Officer. I cannot possibly recommend such a Salary being given him as it would be doing injustice to Mr R. Subbaraya Iyer B.A. L.S.I., the District Sanitary Officer of Kadur District who was given only Rs: 150/- p.m. to start with and who I am satisfied is doing excellent work in the District.

14 Having regard to the dearth of Sanitary Qualified medical graduates I think the only way out of the difficulty is to gradually

NOTE—Contn. sheet.

GPB—50,000—13-5-08.

Serial No.

ascertain the requisite number of medical graduates possessing the qualifications as Assistant-Surgeons and posting them as District Sanitary Officers on their present pay with some special local allowances.

15 Having been trained in the medical line & undergone a full course of Studies in Public Hygeine these will not fall greatly short of the Sanitarily qualified officers.

16 Should the Govt: be pleased to approve of this Scheme I shall try & get one for the Chitaldrug District—

17 In regard to the last sentence ~~X~~ in para I of the Chitaldrug Dy: Commissr's: No: 1812 dt 15th April 19 all I can say is that it is a laudably ambitious Scheme & it is doubtful if we can afford to find money for it—

C. J. Cadenhead
Sanitary Commissioner.

18th April 1912.

24/4/12

GPB—50,000—13-5-08

Letter No. 1620 dated the 9th/10th March
1912 from the Deputy Commissioner, Chitaldrug Dist.,
to the Sanitary Commissioner
in Mysore.

I have the honor to state that Government Order No. 7636-45 Sany., 132-08-2 dated 11-2-1909, requires that sites acquired for extension and shifting of villages, should be approved of by the District Medical and Sanitary Officer.

It has come to my notice that much delay is caused in obtaining the opinion of this officer, since he cannot move out as often as occasion requires, without seriously hampering the work of the Hospital at the Head Quarters.

Although Government Order No. 12465-75 Sany. 132-08 dated the 12th June 1909, requires that a period of 15 days or one month may be fixed within which the District Medical and Sanitary Officer should inspect and send his report to the Revenue authorities longer delay could not be avoided in these cases, as the District Medical and Sanitary Officer finds it practically impossible to answer such urgent calls in addition to the equally urgent and important duties connected with the office he holds.

On account of delay in these cases, the villagers are put to great difficulties either for want of space, or have to suffer much, being compelled to remain in unhealthy places.

As the health of men is concerned in these cases, it is desirable that they should be disposed of with all possible promptness.

Similarly in places like Chiltaldrug, where, besides the Surgeon there are only one or two Sub Assistant Surgeons, it is not safe in the interests of the officers and the public to allow the Surgeon to be frequently out of Head Quarters.

I therefore think that where there is no separate District Sanitary Officer appointed for the District, the opinion of the Sub Divisional Officers or of the Deputy Commissioner as to the suitability of the site to be acquired for extension and shifting of villages and for burial grounds, may be taken to be sufficient. Simple rules may be framed by the Senior Surgeon in Mysore for the guidance of the Revenue Officers and with the help of these rules, they may be expected scarcely to make a mistake as regards selecting proper sites for villages and burial grounds.

This will not only secure the speedy disposal of these cases, but will avoid unnecessary hardship to the villagers on the one hand and the townspeople on the other.

If the above proposal meets with your approval, I request you to kindly obtain Government Orders in the matter.

Letter No. 4328 dated the 4th April 1912 from the Sanitary Commissioner in Mysore to the Deputy Commissioner, Chitaldrug Dist.

In reply to your No. 1620 dated the 9th/10th March 1912, I have the honor to state that the plea

plea of the District Medical ~~and Sanitary~~ Officer is untenable as the other District Medical Officers who also are District Sanitary Officers have been doing this work without any inconvenience to the Hospitals in their charge. Till a whole time District Sanitary Officer is appointed the District Medical Officer and under his guidance the District Sanitary Assistant could and should easily do this work.

Memo No. 4349 dated the 6th April 1912
from the Sanitary Commissioner in Mysore to the
District Medical and Sanitary
Officer, Chitaldrug.

Copy together with the Deputy Commissioner's letter No.1620 dated the 9th March 1912 is forwarded to the District Medical and Sanitary Officer, Chitaldrug District for information.

Letter No. 1323 dated the 9th April 1912
from the District Medical and Sanitary Officer, Chital-
drug District to the Sanitary
Commissioner in
Mysore.

Your No. 4349 dated the 6th April 1912 forwarding for my information copies of the Deputy Commissioner's letter and your reply thereto.

Adverting to the above, I have the honor to

to submit for your kind consideration and disposal, that all the building sites, as also other sites are inspected and reports thereon sent to the Deputy Commissioner as promptly as possible with due regard to the conveniences of the villagers. I have never pleaded any excuse or made any complaint to him with regard to my work at the Hospital here. I have already disposed of all his site requisitions received up-to-date and none are pending with me except 4 or 5 of them recently received and if any body has been put to any inconvenience during my absence from Head Quarters on Inspection or other duty, I beg to submit that it is not my fault, there being always one or two Sub Assistant Surgeons present in the station during my absence, whose services could be readily availed of, if needed.

Letter No. 1812 dated the 15th April 1912
from the Deputy Commissioner, Chitaldrug District,
to the Sanitary Commissioner
in Mysore.

Adverting to your No. 4328 dated the 4th April 1912, I have the honor to state that the proposal to relieve the District Medical Officer, of the work of inspecting sites for villages and manure heaps was not made at the suggestion of the District Medical Officer. As I am aware that the Medical Officers in Madras, Travancore and Cochin do not do this work, it was my intention to suggest that in this respect Medical relief in our State should be similar to what obtains in those places. In Travancore, every Taluk, and several important villages have doctors with University

University diplomas who work directly under the orders of the Senior Surgeon.

There is a separate sanitary staff. The Medical Officer at District Head Quarters, does not have to go out either for Sanitary Inspection or even for inspecting outlying stations, so that he is always available for his proper function of Medical relief. There are always more than one duly qualified men at District Head Quarters and in some important towns.

In this District, on the other hand, after I wrote to you, I myself had to depute the District Medical Officer to go to Hiriyur for some urgent sanitary insepction, and just when he was away, his presence at Head Quarters became essentially necessary for my own family. Fortunately, by God's grace, all went well, but the contingency of medical aid being needed and the only qualified man being not available even at District Head Quarters, is too painful to contemplate, and condemns our system as a make-shift one that has to be changed as soon as practicable.

If you think that the Sanitary Assistant can do all work connected with sanitation, I have no objectio but I think it is necessary for bringing our system into line with that of countries that are more advanced in this respect, that the District Medical Officer should be relieved of sanitary work. I hope that in time our Taluk Hospitals will also have better qualified men so that medical relief and inspection work may be even still further separated. You will no doubt agree with me that a person who administers medical relief at District Head Quarters (especially when he is the only qualified man) stands on a

a footing altogether different from that of other District Officers.
